

Why Choose Absen iCON?

All-in-One Design

The Absen All-in-One Display redefines integration, featuring ready-to-use modules, a precision-engineered control box, robust wall mounts, chic decorative bezels, comprehensive cabling, and all vital display components for effortless setup. Dispense with extra peripherals — your complete solution awaits.

Maximized Visual Impact

Spanning 108 to 209 inches, the Absen All-in-One Display range delivers a sleek, uninterrupted viewing experience, free from the distraction of bezels.

High Brightness

Featuring 0-600 nits of brightness, the Absen All-in-One Display guarantees clear visibility in any lighting environment, obviating the need to lower ambient lighting.

Cutting-Edge Display Technology

Absen specializes exclusively in direct-view Micro LED displays, integrating state-of-the-art technology to deliver exceptional image quality and performance, tailored for your enterprise demands.

Compatibility

Seamless integration with Crestron, Extron & mainstream centralized control systems enables power on/off, signal routing, brightness adjustments via single interface.

Fast Installation and Maintenance

The Absen All-in-One Display is designed for quick installation via wall mount or mobile stand, ensuring straightforward maintenance and swift assembly.

Professional Service, Exceptional Experience

Absen delivers comprehensive global service, supported by 500+ certified partners, multiple contact channels, and a 24/7/365 response time as quick as 10 seconds, ensuring timely, expert support for all customer needs.
